The Peerless refrigerators are made from the best kiln dried lumber, and shrinking and warping is impossible. The provision racks are made from the best tin, are very light, but stiff enough to sustain 100 lbs' weight. The space between the outer and inner cases is closely filled with a mineral fibre which is superior for this purpose than any other used, as sawdust will decay and rot and charcoal will settle and leave blank spaces. The mineral fibre in the Peerless refrigerator will never settle or shake; it is colorless, odorless, indestructible by heat or even fire, vermin or germ cannot exist in it, and as a nonconductor of heat it is double that of charcoal and greater than any known substance. It is much more expensive than charcoal, but is more economical and meets the requirements to infinitely better advantage. The Peerless are the only refrigerators in the market using this mineral fibre. These refrig-erators over two car loads were consigned to other parties and through in-ability to handle so many they were given to us to dispose of, and we have put a price on them that we warrant is 50 per cent cheaper than they can be bought for elsewhere, as you can see by reading the following prices:

Who Gives Most, not Least Succeeds.

My Son: The large tailoring establishments like Nicoll the Tailor, who refuse to credit anyone are fast

proving to the best dressed and most enterprising young men of this city, that they can have their clothes madeto-order at prices within the reach of every young man, and from the most fashionable materials

as well. Their prices are little more than half those of your Mr.-wait-till-you-please-to-pay-tailor on B street, and their fabrics very much superior in style and variety.

Your closest chums down town patronize Nicoll, and you should look to the purchasing value of your dollars.
